AnnaSetu AI — Complete Website Field Guide

“Share More. Waste Less. Feed Hope.” — Plain-English Reference for Every Screen & Field

Platform Context: Surplus Food Redistribution Architecture | **SDG Goals:** SDG 2 (Zero Hunger) & SDG 12 (Responsible Consumption)
Purpose of this Guide: This document gives you an easy, intuitive explanation of **every single page, form field, button, status badge, and AI co-pilot feature** across the entire AnnaSetu AI platform. Use this for presentation walkthroughs, user orientation, and technical review.

1. Global Platform Layout & Persistent Controls

These elements are always visible at the top, bottom, or corners of every page:

Screen Element	Where to Find It	Plain-English Explanation & Function
Food Safety Alert Banner	Top banner (amber bar above the navbar)	Reminds all users that AnnaSetu AI coordinates logistics and traceability, but food safety relies on donor hygienic preparation and temperature holding under FSSAI rules.
Main Navbar	Header on every screen	Displays brand logo, public links (Home, How It Works, Impact, About), quick sign-in/register buttons, and current user avatar when logged in.
Role-Based Sub-Navbar (RoleNav)	Sub-bar below main navbar (when logged in)	Automatically switches based on user role: Donors see kitchen links; NGOs see search/request links; Volunteers see courier runs; Admins see governance controls.
Notification Bell Panel	Top right of navbar	Live unread notification counter. Alerts donors when an NGO requests food, alerts NGOs when food is en route, and alerts couriers of new runs.
Floating AI Assistant Widget	Bottom-right corner (sparkle robot icon)	Interactive AI Co-pilot modal. Answers questions about food safety rules, explains statuses, or provides role-scoped guidance.
Global Footer	Bottom of every screen	Includes links to Trust & Privacy policy, Terms of Service, SDG 2 / SDG 12 alignment statement, and academic project credits.

2. Registration & Sign-In Fields (`/register` & `/login`)

How users establish their identities and organizations on the platform:

Field Name	Input Type	What It Means & How It Is Used
Full Name	Text	The user's official legal name. Displayed on dispatch handover receipts and delivery sign-offs.
Email Address	Email	Your login username and primary notification destination. Must be unique in the system.
Password	Password	Secured with Argon2 password hashing. Plaintext passwords are never stored in the database.
Phone Number	Tel	Critical mobile contact for logistics coordination. Shared only between matched donor, volunteer courier, and recipient.
I am registering as (Role)	Dropdown	Choose between: **Food Donor** (hotels, caterers), **Recipient Organization** (shelters, NGOs), or **Volunteer Courier**. (Admin role cannot be self-selected).

Organization Name	Text	Legal name of the restaurant, university dining hall, shelter, or non-profit trust.
Organization Type	Dropdown	Selects classification: Restaurant, Hotel, College Hostel, Corporate Cafeteria, NGO, Community Kitchen, or Shelter.
Registration / License ID	Text	FSSAI License number (for donors) or 12A/80G/Darpan Registration Number (for recipient NGOs). Key for regulatory audits.
Physical Street Address	Text	Physical location where food is cooked or where shelter beneficiaries are fed. Used to compute proximity distances.
Daily Capacity (Servings)	Number	Maximum plates/meals the shelter can handle per day. **Prevents Overbooking:** An NGO cannot request more food than it can distribute.
Service Radius (km)	Number	Maximum travel distance the organization can cover. Proximity matching filters out listings beyond this radius.
1-Click Quick Demo Login	Buttons on `/login`	Preset buttons that instantly fill credentials for Admin, Hotel Donor, Hostel Donor, Verified NGO, Pending NGO, or Courier.

3. Donor Surplus Food Listing Form (`/donor/listings/new`)

Every field in the surplus food donation creation screen explained in plain language:

Form Field	Options / Format	Easy Explanation & Purpose
Food Title	Text (e.g. 'Dal Makhani & Jeera Rice')	The exact name of the surplus dish or item. AI reads this to identify potential allergens and classify food type.
Detailed Description	Text Area	Context on food preparation, packaging type (sealed thermal containers, foil trays), and freshness notes.
Food Category	Dropdown: Prepared Meals, Bakery, Produce, Packaged Food, Dairy, Other	Classifies the type of food. Cooked prepared meals require rapid hot/cold holding, while raw produce has longer tolerance.
Quantity & Unit	Number + Unit (kg, liters, packets, portions)	Exact measurable amount available. Managed with row-level database locking to guarantee zero double-booking.
Estimated Servings	Number of people (e.g. 50 meals)	How many hungry individuals this batch can feed. Matched against recipient shelter capacity.
Preparation Date & Time	Datetime picker	When the food was cooked or packaged. Cannot be set in the future.
Best-Before / Expiry	Datetime picker	Safe consumption cutoff. Listings automatically transition to 'EXPIRED' past this timestamp.
Storage Conditions	• hot_holding (≥60°C) • refrigerated (≤5°C) • ambient (room temp) • frozen (≤-18°C)	**FSSAI Temperature Mandate:** Dictates how couriers must transport the batch (e.g. insulated thermal boxes vs chilled ice packs).
Known Allergens	Text (e.g. 'Dairy, Gluten, Peanuts')	Warns recipient shelters so they do not distribute items with allergens to sensitive children or elderly residents.
Dietary Attributes	Dropdown: vegetarian, vegan, non_vegetarian, jain, halal	Ensures communities with specific religious or cultural dietary requirements receive appropriate food.
Pickup Address	Street address (min 5 chars)	Where courier collects food (e.g., 'Kitchen Loading Bay 2, 41/1 MG Road').

Pickup Available From	Datetime picker	Start of collection window. Prevents couriers from arriving while the kitchen is still packing the batch.
Pickup Deadline	Datetime picker	Must be collected before this cutoff. Used by the matching algorithm to calculate schedule urgency.
Contact Name & Phone	Text & Phone number	On-duty chef or supervisor who hands over food to the volunteer courier.
Food Safety Declaration	Mandatory Checkbox	**Legal Accountability:** Donor verifies food was prepared hygienically and stored safely. Form cannot be submitted without this.
AI Smart Suggestions	Co-pilot button	Calls Gemini AI (or resilient rule fallback) to auto-fill category, allergens, and recommend improved packaging details.

4. Intelligent Proximity Matching & Scoring (0–100)

On the Listing Details screen (`/donor/listings/:id`), donors see transparent match recommendation cards:

Score Component	Points Allocated	How It Works in Plain English
Geodesic Proximity (Haversine Formula)	Up to 40 Points	Calculates straight-line earth distance between kitchen and shelter. Distance ≤ 5 km gets max 40 pts; 10 km gets 25 pts; > 20 km gets 0 pts.
Shelter Capacity Fit	Up to 30 Points	Compares batch servings with NGO's registered daily distribution capacity. Prevents sending 300 meals to a 40-bed facility.
Schedule Urgency Window	Up to 20 Points	Prioritizes meals with short remaining shelf life (<3 hours) so food is transported before quality deteriorates.
Food Category & Dietary Match	Up to 10 Points	Matches ready-to-eat cooked food to shelters with immediate dining rooms, and raw produce to kitchens with cooks.

5. Recipient NGO Catalog & Food Requests (`/recipient/donations`)

How verified charities locate and reserve surplus food batches:

Feature / Field	Type	Plain-English Explanation
AI Natural Language Search	Smart Query Input	Type phrases like *'Need 50 vegetarian meals for dinner in Indiranagar'*. The AI parses category, dietary tag, and urgency into live database filters.
Category & Dietary Filters	Filter Dropdowns	Manually filter by Prepared Meals, Bakery, Produce, Vegetarian, Vegan, Jain, etc.
Urgent Pickup Only Toggle	Checkbox Toggle	Filters exclusively for food batches expiring within the next 3 hours requiring immediate dispatch.
Listing Card Information	Display Card	Shows donor organization, distance in kilometers, servings count, storage temperature requirement, and deadline countdown.
Quantity Requested Modal	Modal Input	Shelters can request the full batch or partial batch based on current need. Enforces atomicity to avoid overbooking.
Shelter Notes for Donor	Text Field	Notes for the donor kitchen (e.g., 'Will distribute to 45 night shelter residents at 7:30 PM').
Accreditation Gate	Security Barrier	**Unverified NGOs cannot request live food.** They must upload 12A/80G/Darpan certificates and receive admin approval first.

6. Volunteer Courier Logistics (`/volunteer/tasks`)

Step-by-step progress tracking for transportation and food delivery:

Screen / Step	Status Transition	Plain-English Explanation & Action
Available to Claim Tab	`UNASSIGNED`	Open pool of approved donation runs. Any verified volunteer can click **'Claim This Run'** to self-assign.
Accept Assignment	`ASSIGNED` → `ACCEPTED`	Volunteer confirms they have an insulated carrier box and will proceed to the donor kitchen.
Confirm Food Picked Up	`ACCEPTED` → `PICKED_UP`	Volunteer collects food at donor kitchen, inspects temperature and seal, and marks food in transit. Recipient shelter is notified.
Confirm Delivery Complete	`PICKED_UP` → `COMPLETED`	Volunteer hands over food at shelter receiving bay. Shelter signs off. Database increments servings salvaged and carbon saved.
Courier Transit Notes	Text Field	Field for volunteer to record audit details (e.g. 'Food collected in 3 thermal crates at 65°C; handed to shelter supervisor').
Transport Charter Pledge	Checklist on `/volunteer/profile`	Volunteer signs charter committing to thermal chain integrity (>60°C hot, <5°C chilled) and direct, prompt deliveries.

7. Administrator Command Center (`/admin`)

Oversight tools to guarantee institutional trust, food safety, and compliance:

Admin Section	Path	Plain-English Purpose & Action
Platform Oversight Stats	`/admin/dashboard`	High-level KPI metric cards (Users, Verified NGOs, Active Listings, Open Safety Tickets, Pickup Completion Rate) and Recharts distribution diagrams.
NGO Accreditation Queue	`/admin/verifications`	Inspects submitted 12A/80G/Darpan certificates. Auditor clicks **Approve & Verify** or **Reject** with feedback notes.
Food Safety Incidents	`/admin/safety-reports`	Queue of spoilage or temperature complaints. Classified by severity (Low, Medium, High, Critical). Admin marks as Investigating, Resolved, or Dismissed.
Catalog Moderation	`/admin/listings`	Platform-wide listing audit. Admin can cancel or flag any non-compliant food batch for immediate removal from circulation.
User Account Directory	`/admin/users`	Directory of all donors, NGOs, and couriers. Admin can toggle Active/Suspended status (admin self-suspension prevented).
Immutable Audit Ledger	`/admin/audit-logs`	Tamper-evident record of all logins, listings created, reservations approved, and delivery transitions with timestamps and IP addresses.

8. Live Impact Dashboard (`/impact`)

Calculated directly from database tables with zero fabricated figures:

Metric Displayed	Underlying Formula	Significance to UN SDGs
Total Servings Redistributed	`SUM(estimated_servings)` where `status = 'COMPLETED'`	Direct contribution to **SDG 2 (Zero Hunger)**: plates of food fed to people in need.
Quantity Diverted (kg)	`SUM(quantity)` converted to kg for completed runs	Direct contribution to **SDG 12 (Responsible Consumption)**: organic waste kept out of landfills.

Completion Rate (%)	`(Completed Pickups / Total Created Pickups) * 100`	Logistical efficiency index indicating volunteer reliability.
Category Breakdown	Pie & Bar chart by Prepared Meals, Bakery, Produce, etc.	Reveals the balance between banquet cooked surplus and raw grocery surplus.
7-Day Redistribution Trend	Day-by-day volume trend line chart	Displays growth in daily surplus food redistribution volume across the city.

9. Pre-Seeded Demonstration Accounts Summary

Use these accounts for testing, role evaluation, and demonstration walkthroughs:

Role / Persona	Login Email	Password	What to Test With This Account
Admin	admin@annasetu.ai	Admin@123456	Approve NGO verifications, triage safety reports, inspect audit trail.
Donor (Hotel)	donor.taj@annasetu.ai	Demo@123456	Post surplus meals with AI co-pilot, review match scores, accept requests.
Donor (Hostel)	donor.hostel@annasetu.ai	Demo@123456	Post bulk cafeteria meals, view kitchen history.
Verified NGO	ngo.hope@annasetu.ai	Demo@123456	Search food using AI natural language query, request surplus batches.
Community Kitchen	ngo.annapurna@annasetu.ai	Demo@123456	High daily capacity shelter meal requests.
Pending NGO	ngo.samarpan@annasetu.ai	Demo@123456	View verification pending alert gate preventing unverified meal requests.
Volunteer Courier	volunteer.rahul@annasetu.ai	Demo@123456	Claim runs, progress delivery lifecycle (`ASSIGNED` → `ACCEPTED` → `PICKED_UP` → `COMPLETED`).
